

Claims

1. A method of correcting pathologic immune reactions by administering antibodies to cytokines characterized by the use of activated form of ultra-low doses of monoclonal, polyclonal, or natural antibodies to cytokines involved in the course of inflammation, including autoimmune inflammation, the activated form being prepared by multiple consecutive dilutions and exposure to external factors, preferably following the homeopathic technology.
2. A method of treatment according to Claim 1 characterized by the use of a mixture of activated forms of antibodies to various cytokines involved in the course of the inflammatory process.
3. A medicament for correction of pathologic immune reactions based on antibodies to tumor necrosis factor alpha (TNF- α) characterized by the presence of an activated form of antibodies to TNF- α obtained by multiple consecutive dilutions and exposure to external factors, preferably following the homeopathic technology.
4. A medicament according to Claim 3 characterized by obtaining antibodies with the use of human or heterologous tumor necrosis factor alpha (TNF- α), including a recombinant factor.
5. A medicament according to Claim 3 or 4 characterized by containing a mixture of various, mostly centesimal, homeopathic dilutions.
